Education

University of Maryland, College Park, MD
Bachelor of Science in Computer Engineering

Expected May 2026
GPA: 3.89

Experience

Resident Assistant, The Courtyards at UMD – College Park, MD

Jan 2025 - Present

- Directed community development initiatives, increasing event attendance from 5 to over 30 residents by tailoring programs to student interests and fostering inclusive participation.
- Planned and executed 4+ successful community events including ice cream socials, sustainability workshops, resume building sessions, and winter decorating parties, serving 40+ residents total.
- Led conflict resolution for roommate disputes and policy violations, mediating discussions and implementing solutions to maintain safe, respectful living environments.
- Responded to crisis situations involving intoxicated students, ensuring resident safety and coordinating appropriate support resources while maintaining confidentiality.
- Served as 24/7 live-in staff member, conducting nightly property rounds and providing immediate response to resident concerns and emergencies.
- Collaborated with professional staff to enforce university policies, complete incident reports, and maintain detailed RA duty logs for comprehensive documentation.

Technical Coordinator, Electronics Prototyping Lab, Terrapin Works – College Park, MD

Jan 2024 - Present

- Lead hands-on workshops for motors/sensors, soldering, Arduino, and PCB design, mentoring 10-30 students per session in practical electronics skills.
- Provide personalized project guidance to students, helping them develop technical competencies and apply engineering principles to real-world applications.
- Maintained 90% equipment uptime for LDK PCB prototyping tools, ensuring reliable access for 20+ students and faculty per semester.
- Conduct training sessions for new lab employees and expanded outreach to increase campus awareness of electronics prototyping services.

Undergraduate Teaching Assistant, ENEE205 Electric Circuits – College Park, MD

Sep 2025 - Present

- Lead weekly 3-hour laboratory sections and 1-hour office hours, providing individualized and group instruction to 12 students on circuit theory and analysis.
- Evaluate homework, lab reports, and quizzes while offering constructive feedback to reinforce learning objectives and ensure student comprehension.
- Facilitate hands-on application of circuit concepts using oscilloscopes, signal generators, and simulation tools for practical engineering education.

Leadership & Community Development

- **Community Event Planning:** Organized Scoops & Study Breaks (15-25 attendees), Sprout & Snack sustainability workshop (8 attendees), Resume Workshop (3 attendees), and Warm Up & Wind Down winter celebration (20 attendees).
- **Conflict Resolution:** Successfully mediated multiple roommate conflicts involving policy violations, implementing fair solutions and documenting outcomes.
- **Crisis Management:** Handled incidents involving intoxicated students, providing immediate support while coordinating university resources and maintaining resident safety.
- **Student Mentorship:** Guided residents through academic challenges, connecting them with university resources for mental health, career development, and personal growth.
- **Inclusive Leadership:** Fostered welcoming environments across diverse backgrounds, promoting respect and community engagement through targeted programming.

Skills

Community Leadership: Event Planning, Conflict Resolution, Crisis Management, Student Mentoring, Policy Enforcement
Communication: Interpersonal Relations, Active Listening, Group Facilitation, Written Documentation
Administrative: Incident Reporting, Duty Logging, Resource Coordination, Confidentiality Management
